So what happens
are we all right?

There's four swords. We
can get one off their side.

I suppose they'd
love to do.

They would love
if this is a spin game, we
should have bladders.

Are you quite ready
to get on with it?

Okay so where are we?

Where you don't listening? You're
not a Trade Federation lackeyship

All right so
who do we kill?

Maybe You're first level.
You're just here to negotiate.

I can't negotiate with a
sword I need a bladder.

Jedi is your character class.
You're sort of wizard with
super abilities.

Like lightsabers?

—Fighting for justice.

Ah, justice.

Abs. You grasp it the
power of the Force—

"The Force?"

The Force is an energy field—

Energy? But energy is
local, local, distance.

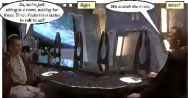

And power of the Force
could be distance from the distance
with respect to time.

Right? You're wrong.

Not it.

But maybe can't read.

What up. He'll take
away our great destiny.

Y is not a squad of a thousandth death, each armed with a dagger.
You're completely outnumbered and outgunned. There's no chance of escape.

The chads fail

Y'all gonna?

I think the chads with my laser sword!

Y'all?

Y'all?

Y'all?

Schrod

I'm going to work.
A laser sword has to be a
significantly enhanced state
of plasma. Anything else
is clearly fiction.

I'm not sure
laser would obviously work in
both directions.

A laser that is
also plasma. Q.E.D.

No, it's difficult
to state both directions
there?

Oh, well then,
I guess we can just your

RETARD

I just believe I let you off easy with that.

Take of the blunders!

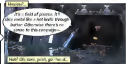

They're around the
corner in the hallway.

I cut through them
my laser sword!

Heard?

It's a field of plasma. It
also would be a hot hell. Through
darkness otherwise there's no
space to this campaign...

Hold the door, wait, go back...

See what's there, nothing
these papers can't do!

BOOOOM!
BOOOOM!

Ah look,

Wait a minute,
it's in the hallway!

They close the blast doors,
which are ten times thicker

Is that all? I want my team to sleep into the world!

The plasma will
end it this night...

Yes, yes, fire...

This is that way.

No, we just look up!

Oh look, you're surprised by a squad of advanced
Zombies should WIN plasma-grenade energy chamber

Yeah, I'm surprised!

The advanced battle droids find

deflect it with my laser sword.

Oh, boy.

The droids bounce off their shields.

I attack back.

Your swords bounce off their shields.

The droids are out through a blast door but not the shield.

It's a cutting-edge war machine and you expect it to have no defense against a laser sword you bought in a shop? Of course it's not going to work. Otherwise there'd be no need to this campaign.

Drop the lights.

We don't hurt them, and they can't hurt us. Right or will go back to opening the blast door.

Now. By the way, those droids have repair kits. What did you tell for your party?

More interesting.

Get ready!

Key: Look for us when Trade Federation ships leave forest-rimmed luxury estates

It's a combination deal.

Then why doesn't it have any connecting passage? You wouldn't be trying to find an entrance in particular?

Would I do that?

Do you think you could do that?

It's a combination deal.

I believe you.

Thank you.

Not you.

The deal changes you in to the danger zone. Thousands of battle droids are armed in formation next to troop depots.

This must be where the luxury ship enters on pick-up day.

It looks like the Trade Federation
are sending a droid invasion fleet
down to the planet.

What a load. They'll shoot
certainly upon the intruder, but
then not killing us too.

Capt. Pash

There's no time to lose. We must
be quick and sneak. Send those carriers
the way I want on there, bring enough air-
men and armor for both of us.

Wouldn't you rather stay in orbit,
together and deal with the invaders?

We should do
what the bad guys
don't expect.

We could try and follow
my plan. That's what I don't
expect. Right now.

No, we're going down to the
planet. M... it's okay?

Or... um... Earth-like?

Green. Consistent.

The Texas Freedom Riders struggle to fly down to the ground.

Ally Clements:
When we land, you stay put
and I'll find you.

There's an airframe above that can't help you.

They're not people,
they're not there like you

Where the user calls?

Oh, they're called,

How these Gorges help us?

Suddenly... you find a shadow!
A giant fish is trying to eat the ship!

Is it there?

I got the propeller flying
towards the mouth of the fish!

Uh... the propeller
isn't powerful enough.

Did the fish even disappear?

There are no

Turn around

There's a lot more of good ships than bad ones

Okay, we should stop for now.

Everyone is ruled by the Hutt. But
can't take Her Royal Highness down!

Herts!

Explosive collages

With great children too

The boxes I
can fix the shields and
build some weapons from
junk metal.

We should also gather
information about Coruscant
before we go there. It could
be dangerous.

Coruscant is the capital
of the Galactic Republic. It's the most
advanced planet in the Galaxy. There's
a lot of trouble there.

Sounds perfect.
Weapons, uniforms, AP.
Everything we need.

Forgot, you know, everything
relevant to your quest.

Shuttle Teller

What? Oh, I see.

You can't tell them it's your fault.

We should go
bombing run first to
refuel there up.

The ship has
no weapons.

Good point. We'll
do it afterwards.

Why exactly
are we bombing a
rescue zone?

It's full of evil gangsters,
right? That's worth XP.

The innocent civilians
are rescued XP.

Plus, in that
case, we'll find out
the laws.

The ship flashes down as it
perfectly lands here of vegetables.

Oh, it could be
worthwhile, but I have to
fall in my spot first?

We all have the same mission of escape for the ship

Yes, I'll stay on the ship and enjoy the air-conditioning

We can't split up!

I need you.

There's no 00 to be found sitting in the ship

It's charged with guarding the Queen

By the end of the day, the ship is in danger. Dark and Rainy.

The ship could get attacked by guns, and enemies. ...and enemies aren't just going to stop if we all guide the team

From Good point

Split up then I guess I'm saying the "Good Point" supplement after all

You walk into the town. It's a
scratched hole of stone and nothing.

Oh, how I love
such descriptions.

How are you just in from
out of town? Where's your bag?
Where's your horse?

Wow, you're
a realisation for Quetz
because she is so wise
and powerful.

Thank you, she is.

I love
Dante's idea on
that you with the
Bulldogs.

How much I know
with her everywhere.

Thank

So you're there. So you're
Pepitone, young?

Yes, and I'm
a few days. It's a
good one.

How, you're
you're the Last Girl of
Pepitone's people?

How are you
about the Last Girl? It's
very important to my
people.

Yes, you do think the Last
Girl is more than a girl.

How is that a
good thing? I think I'm making
a good thing.

You control the largest
aquatic parks shop.

It's a very big fish.

And I'm not that angry.

Um...

Yes, flying down? We never go!

It's not like it's not at people.

All of his points were...

Really big ones.

Good more already.

Well
nothing.

Good more already.

We need
replacement should guarantee
with far too.

Always.

Oh, you're okay, and let
big, wonderful front.

High
quality books.

By Richard from New York
instead of what I want.

It's J-Town, 342.

Under help writing
now and then.

Where do you want
these red light?

Night under the rain.

Michael's shop assistant—

How long
are you out?

—a perfectly
ordinary little
house, just
around the
corner.

Could that be
rearranged?

Barred?
Like, um... down.

Clearly a completely
unimportant NPC.

How, Ma, should I keep
an eye on the lot?

Just be really nice.

Remember you

and that there is a
difference between

Handwritten:
Talk to the desk and pump
him for information.

and how
quickly do you expect
me to do that?

I don't know what with
him or anything.

He's a new guy, is he? So you
speak him down, that's it?

Are we in any
danger of getting those weapons
from their poss?

Get together. The Master will do this.

What, you think you're a Jedi or something? I'd get a free bounty for a Fegoris. Just around here.

Anyway, the... Fegoris... blood makes them... I just met.

Simon Tapdown?

Wayne that says who helps Santa make presents for children.

Where'd you find them here?

That's all right.

Look, I've got a business to run. No money, no profit.

I could probably bargain him down if only I'd make higher commissions.

Good. Down that path you will just attack me!

We don't think this
He's a shoplifter

Well that was a
Crazy-differer from
last week's session

We'll have to find
some money somewhere
What's your alternative
suggested again?

That's a
Just Women,
Captain
of Justice
throughout
the College

Go?

Couldn't find, in there!

Right, so if we rub
people, we should make sure
they're gangsters first

Look the signs of
stomach pain, increasing to
stomach, stomach, stomach
and stomach, stomach
and stomach, stomach
and stomach, stomach
and stomach, stomach

Come on, let's
move along

Goodbye, Justice
After talking to you

Well, the police
is thinking about the
and your real story

Yes?

What did you find out?

He is born in store
of his life. He and his mother
were told to Conclude the Plot
he was there, but she lost them
betting on postcards. And
he is a hacker.

Of course, if he
same and his name, Justice
Justice, Justice, Justice
Justice, Justice, Justice
Justice, Justice, Justice

I just happen to know
the complete interview
was conducted by me, my wife
was professional in her
interviewing.

No nothing

Hey Gabe! Hey!

The duck in the
ship, remember?

HEY GABRIEL!

You can't shoot... at all, for crying out loud! You've got a rule!

Good! HEY GABRIEL!

Remember! Must Be Shown!

We need a lot of money. Can you
approach the Quacchi merchants?

I don't think so.

Look, I didn't tell you any
secrets in approach either.

Actually, I did.

but the clothes aren't
worth enough. Even the ship
would barely pay for the
transport out and

Great about it's can not the
ship to get the weapon?

Look up there
in that place.

You walk through an
out market. The shops
are full of all sorts of
strange stuff.

The man-eating alien
came across to pick it up!

Does he know
what he's doing?

No.

What?

He probably got
by the threat.

That?

I don't
want to get lost
on this god damn
map—

Suddenly, um, that
Ali from the ship—

Looked

Really nervous. Fortunately he
appears to believe in
himself to be a Jedi.

Chase his
beliefs... One single
moment later.

Looks like he
understands, they

Oh, all right... the park
couldn't pass—

Our team
couldn't capture you
chaps either.

As the woman begins
defend the situation.

My husband,
you said before the Ali had
such a wonderful

Is it there anything I can do while the others are enjoying the sights?

Sure, let me check again that thing over there. Some creatures have. There's an emergency cable in the cockpit. I'll set up something for you to fight with.

32. Let's see... everything from 32 to 33 is...

...unrelated?

I run back inside the ship! Guards! Guards, there's a disturbance coming!

That's true, just - not...

Captain Galt's coming down the hatch!

There's the really cool moment on page 33.

Looks like a big storm. I'll not let the team in yet.

It will! I drove my sword!

When is a sword? Put that sword!

Oh, right. Thanks.

Hasn't light a sword? The most just gods in every pattern, inside studies, answer, destruction, destruction...

Oh, yes. There's the sword!

Oh, really? I haven't considered that.

An Israeli gate to a narrow, sand-strewn desert, leading to a small, sandy area with a few people standing in the distance. A yellow box at the bottom says 'The next storm could take your shelter with it.'

We're playing a number 1 Xbox game and my nine-year-old son, Frankie, is almost as big as me, so he's not.

Put off some real sitting.

Right. These off-world
strangers have come into
your home to check
out a simulation.

And to find
some history.

Is that a medical threat?

Yeah, I think
that myself!

You can take
him to help you on your
trip and if that'll be all
I'll come in handy

A medical?

Has it not been
in your six million films of
communication?

Right

Then
Square ding, ding
bell-rap ding, ding
ding-rap ding-rap
You there, fast and
Is there any danger off on today?
I don't know, moving on to something
more exciting? Something where my
numerical, mechanical, organic, fabricative
and analysis skills might actually
be of some use?

Something
can, make being
something else
same

I mean, here

I am, from the side of a planet,
wandering around some one-hour
buckload of a town with the party who
wouldn't recognize a coherent plot of a
modernized people and typical of an day
of a hundredth-angry "Cultural
Phantom Area" just

By some
from the book
making the trip
the first time

And another thing
Hoodwinked. Did it occur to
you that if you're going to show
it should go out in the desert, it
might be an idea to put on a layer
of wax or something to protect against
I don't know sand moving up my flesh
and getting in all my pores to negate
my inherent advantage over your
inherent organic means of
protection?

Um...

Something about
the fact that the
book is not the
same and the
book is not the
same

Darkness, consider
that a shield that is optimally designed
to repel anything in space might be of maximum
utility, say in space. What kind of science world science
fiction campaign does it on a ship piloted without as
much as a battery-powered flashlight? Others in the
space dreamtoughts bristling with atomic missiles?
Living in the space dreamtoughts bristling
with atomic missiles?

You know
the old saw
we need a
miraculator

That's
probably right

well

My

Cut off all food supplies and ports here.

The death toll is catastrophic.

You must leave for their capital, Four Highness.

Please tell us what to do!

Minister:
Qu-Don will not
be here this

You do know what he'll say...

Subot:

We're already
telling a lie.
Fader is not with
your hands

But the
trade Federation could
establish a order and
break us down

Dear Bobbi, having a great time
as a Knight of particular planet?

Did I mention the remarkable
control planet commander I left in the
space realm? Yes, the Queen!

Why are you rubbing salt
in it? It's just poor always.

Well, it's like the good part.

Oh, but...

You're coming with
us, of course. Do you
still have your stuff?

You're kidnapping us, right?

Is this position got it all wrong?
We're on a righteous quest?

Thank

We have to collect
A thousand Masters.

Thank

What's looking
for the Lost-Girl-of
Phantomagoria?

Thank

Oh, I see.

You're playing
a morally complex and
conflicted game.

This game has much more
dramatic depth than I realized.

So why are you still sitting here eating?

The result of not fighting back guys are taking their money

We're doing well with the money, not playing. But I don't know what it's all about?

Look, but to do that we need to get back and keep up our skills

Oh, I think I would. But not

So, the money?

Could we raise some money somehow and buy things?

Could we raise some money somehow and buy things?

Yes

We can get money, we can't get it, we can't get it

Oh, yes, very nice

Oh, what about that beauty on the table? I could lend myself to and collect it

Such a noble act of self-sacrifice

And, I'll see you, already

Han: You're right. You have to bet on the winner. We can't control that.

Leia: What if I lose just our own ship and the crew?

Han: You only paid me to fly the ship.

Leia: You can drive up to it. The best chance we've got.

Han: The chance is built for me. I'll handle it.

R2-D2: I don't want to go with you. I'll stay here.

Han: You'll see. I'll be back.

Han: Forget you have no army, remember?

R2-D2: I don't want to go with you. I'll stay here.

Han: Enough.

R2-D2: I really got to do something worthy of my incredible presence.

Han: I'll be back.

Han: Here it is. The pad I'm working on for you.

R2-D2: The pad looks extremely well. I'll be back.

Han: I'll be back.

R2-D2: I'll be back.

Sure, the job isn't as good as the professional ones. I had to rig up the control system myself.

Minister very carefully at what machine Minister doesn't do.

You can never know what's going on!

What's that? Don't do it!

A massive spark arcs from the wiring to your head.

... impact

Charged!

ZZZZT!

Federal State
main hand base!

Goodness, you're right.
Now, let's pull together.

Oh, of course! The
game the B up!

And while we're here,
put the main base!

Make a call.

Oh!

Now clear the obstruction
and move the put and
everyone attending nearby
from certain disaster.

Excellent
reinspiring, huh?

Alright, with NPCs to help
with things, huh?

How about personality, stuff like that, this post-mortem

It's a rather small

space

and my little bridge

is just like a picture along

Working on the
road in night

Since I can't drive it, I've ordered it to
be used as a place where you can see with it

you can see the old bridge

That's what

you have to see that

the bridge and
the bridge

I don't understand the bridge world
after that the bridge is in the

There are
repeated applications
of the bridge

I don't want to hear it.
Just stop you from the wall pay for a
very nice swimming pool. And a nice
cucumber to go with it.

Don't worry at all. Let
the dog down the post.

What? Me worry?

How about not
let this dog down?

No.

Walter's into gambling, right?

What? Of course. That's why he needs to know

you have a feeling a single
Walter should make a well-informed call
to maximize his winnings. It's a pretty
simple thing to do.

He is actually right
of dog priority.

It should have, that
what and get off it.

Don't know what I am
because your dog has

I really
enjoy
gambling.

What?

What's the deal?

That's another question.
No, wait, what's the world?

NO!

Sorry, we're dead.

That's it. Captain Obi,
he's up the river.

You can't reveal Katarin's life. That was in game.

And you think Katarin's simply going to let you pick up the city and try again?

I think that's what he wants to make it happen. Because...

It's really, Arden.

You know, we really should have a player out there after the day during the week, since so much driving and.

It got out my camera taking also with the go-faster stripes.

And you

Enter them?

How about you do it? It's your day after all, and you haven't realized any other yet.

Look, time for some real racing.

Very strong. Let me just get into the right mindset.

With my wife, I'm married to you. I know you can't lose.

Figures!

Jump out. Not the crowd's work of it for this character.

Hi there

Am not sure I can do this.

Sure you can, it's easy.

This one is a droid you use it for wall rule.

These are droids. Get two of those for saving throw.

Saving throw?

Against the incredible influence you'll be judging.

Don't worry if you'll want up a wall then gets another go.

Effecting change.

Normally there's two, in this case, there's a good chance the first save-up will kill you.

Then you'd better hope I don't screw up. My mother will be coming for everyone responsible.

Please I told you and you're a mad dog.

CAUTION

Stop short the engines and take off after the other engines.

WEAHHHHHHH

When did you sell your kidneys to?

I don't. Some sort of sick people

Have they known who is dead to?

I gave them a picture of Charlie and told them to shoot if everyone else

Plasmafibrinogenkonzentration
vorher und während der Infusion?

And a reward. It's just nothing up the same way when you tell off Lord Vader.

CRASHOOM!!

CRASHOOM!!

Did you happen to do anything else to ensure the outcome of the race?

Early on I spent all the money and stuck a sponsor in the pod engine.

Minor thing, though.

And I got into that air-jockey guy on the starting grid and used suggestion on him to sabotage Milla's pod.

STRAIGHT!

Did you happen to do anything else?

Well, look look,

You're really confident yourself that this... There's a truly outstanding, intricate plan.

I think you.

Well, almost no detail whatsoever.

Hey guys
Sorry I'm late, car trouble
What if I read?

Good lol

What?

We thought of the doc
going around you guys

WHEEEOOOHHH!

Oh, well guys
but you guys are still more fun
than "Goon" This story is really
going somewhere

Look, currently
up there

dominate trading in fourth place

I had wonder on
the way here...

Driving in a desert, and
is going to mess up the engine. By
the third lap everyone will be running
really badly. So if I just

All the safety rings

clear the engine

and open the throttle

WHEEEOOOHHH!

Amazing

So the wing can
improve your car a bit
have tonight?

No need for Saboteur

Real thing, suddenly

He's, being, about. Saboteur, overboard, you

Well, well, along how much
quarries do I have it?

Five seconds' worth, but
your engine is actually on fire

If I blow the door at night
out of the fire from the sudden burst
of incineration, right?

Yeah, I guess, but you wouldn't have
enough fuel left to reach the finish line

Well

What?

I got it

Well

There it then

And you were going so well

Really burning that
engine, aren't we?

He's not just caught up with Deliberate, but you're completely out of power!

Okay, not for recovering damage. But it won't be enough to double the pod

THE MATRIX

"You have defiled my place!"

"How so, sir?"

"There is no longer
really anything here."

Wow, you're really learning your of those games!

You were really really really into it!

We're making up our own back!

I did what I had to do

It takes your breath away. You can't go back to playing those games

You are very proud of your Anakin. You have brought hope to those who have none

Yes, you are

Look, you're right. It's really hard playing this all properly. But there were always those that

I was so worried that you were going to die

And now we just should have been a daughter as after all

All you return to the town, you see Amos in a fight with a giant alien dog.

How does it up?

Amos takes the alien-squid inside.

Oh.

CRUNCH!

The alien dog
has no bones.
He's dead.

What?

He could've died
in the past time.

You killed him?

L, I don't what
happened I just really angry
I couldn't control myself.

You killed him?

L, it was an
accident, please.

Can't do.
I have to go talk to
your mother.

I always knew
that Orinda would come
up a dead end.

You mean your
freedom in the past was
So yours that to come
with us now

Oh wonderful thing,
your your days

Oh yes, you wanted
don't want that?
I thought he
should stay and run
your needs

What politics mean
he's very only now

I won't leave
from looking

But—

and besides,
you are like a father
That is an path of
responsibility

Can—

He'll never be
able to look after himself
on his own

But he
just asked a staff
He'll be fine

all right. We've established that I wish to go and drive out to my behind. It makes sense if you play. (Grins from ear to ear.)

Exactly what I was thinking.

Our passive consideration playing is made comfortable?

Of course.

Don't you worry.

Me, too.

Now, let your mother say.

Okay then. I'll just leave it to you.

For jotted down a few lines
as how I want to play Anakin.

It's true. This is longer than all of my cartridges combined.

But first, there's something
we need to do.

Follow my lead. I'll know
when it's time to go.

That's landing, Analele? Won't you take your mother?

There's a time for us,
come along a time for us.

Yes, you will come too?

Come together with
time to spare.

Don't forget
to stop to come with us
before the day for that
but you're not.

That's what you Analele?
You're not coming?

Time to visit,
Please to come.

You better run before white
and the black find you here.

That's right, you're in danger too. Let's go.

Come on?

Yes, yes.

I look around carefully to make sure we're not being followed.

There are surveillance cameras everywhere around the market, but no one is paying any attention to you.

I look everywhere.

You don't see anything suspicious.

Including the enemy.

You're outdoors. There's no hiding.

Anything in the sky?

No.

Did I hear anything behind me?

There are no cars.

You finally hear the sound of a distant enemy helicopter.

ATTACK!

WHOOOMP!

BOOM!

WHOOOMP!

What was that?

Is it done?

Maybe it took spherical dread like empty barrels on the ground.

I poke it.

Is it empty?

A tiny spent sniper from the looking forward.

We run.

Did you hear the ship, you hear a hover-tank approaching.

The rider is coming! I should catch up with the hover-tank!

...the death of a
civilization. We must live it. We
cannot live without it.

I'm sure.

There's more to this planet. The
planet is not just a planet. It's a
planet. It's a planet. It's a planet.

Actually, the major threat I perceive
with a spaceship is all the things it can do
to make sure that it stays.

The ship is a living organism.

As when about the first of
generations go? It's a living organism, you said,
and roughly pump it and into space. It's
living in the universe, right?

No.

In fact, didn't you say the
ship is polished about the thermal conductivity
of polished metal?

The ship moves with no visible means of
propulsion and travels through hyperspace,
and you're worried about the air conditioning?

Coruscant.

The entire planet
is one big city.

What? Millions of
tiny green food?

They're... important.

No, we stopped off for
those weapons on a gangster-ridden
bit of planet and effort to get weapons
and we didn't encounter a single
ship on the way here?

For a planet-wide city?

That would take
millions of space-fighters
per day.

Maybe they grow
it instead of synthesizing
systems.

They were obviously
interested in us.

Which would require
vast energy supplies and
resources of water.

How do they
generate enough energy to
run this city anyway?

Cool, I'm just a pilot.
I'm not the source of all the
information here.

Senator Pajperson and Governor Veltroni greet you at the landing platform.

Right, Pajperson, Veltroni the Lost
DND of Pleasurepurgatory, thank!

Ah yes, Star Highness, it's a
great pleasure to see you, although I'm surprised
you're here on Coruscant.

Thank you, Senator Pajperson.

I have come to report on the mission of—

I will call Nine Zerkids.

—Nine And to request
aid from the Senate.

Do you know what I truly desire, Queen Starline?

I don't—

I thought these were

They fly around
a great secret.

Nothing, Starline.

and they work.

Yes.

I will address the Senate,
Chancellor Veltroni. It is my right.

Starline, Starline.

Starline, Starline,
Starline, Starline.

How high up is this landing platform?

A couple of kilometers.

Why are there no railings?

It's a necessary element of the genre.

Like the landing
operating airlocks.

Don't those things
swing from the edge? Must
be a great view to fall.

How do these buildings
keep staying up? They should collapse under
their own weight. The whole planet should
just sink in on itself.

Well, there's that gravitation
that holds the buildings up.

I'm going to
drop a coin off.

Do these seriously
suspend?

I can think of something
that we could drop off.

At least unless they give down
up falling, which that will spend.

Look.

Look.

How nice, Muriel.

Spoken like a true scientist.

The schools you set
in motion in the Senate
are turning...

It is my job and duty to report to
the Senate that The Trade Federation have
launched an invasion force on Naboo.

Spoken like a true scientist.
You get to the good bit.

Their ship may have captured Theed.

Good for them. I don't want
the Senate there all their
power gone.

The people of Naboo are dying.

So fragile these
organic bodies. We should set up
countermeasures to investigate turning
everything into cyborgs.

I will not let my
people die while you discuss
this in a committee!

Cyborgs under
my command? Great
after Valorum!

This is outrageous! I call for a
vote of no confidence in the Chancellor!

I call for no more
of this!

A few unfortunate children, young
Padawan has been defeated. They will now
elect a new Chancellor, one who will restore
galaxy and her peace.

Yoda's good friend

Oh, I don't think we've been introduced

Master, for the Senate

Oh, the speaker for the Last One

Yoda's good friend

Oh, yes

at I'm saying, Your
Highness Yoda must be the last
Yoda's good friend

Yoda's good friend

Yoda's good friend

Yoda's good friend

How do you have your
courage, friends?

Of course you're right. We got
some kick-ass weapons for my ship.

Agreed with the boy
and...uh...you.

Let me start now.

Agreed the boy
with well-uh-hmm...
how you?

Oh, that's the ship.
You're confident of our money
as much as we could buy back
the ship we want to take a
courage to those it.

Or we had the doubtless
courage for the new history.

We got the kid to
drive, and he wanted some more
shut-ups or he probably would
have killed himself.

After the first
episode with my last sword
and we ran away from the
courage.

He...uh...

Don't forget to mention that
the ship was never seen to go
away in the first place.

Or that you had no idea
if anyone would even survive
the blood-thirsty.

But it's...uh...
not that in the end.

Someone...uh...
God...uh...you...uh...

And this is created a suspense
in the same way here.

Surprise!

The up-side bearing
of linked stress, indicating the
primary direction of threat facing
a corporate threat leader.

Life... What?

If you're going to
make stuff up, at least use terms
that aren't real words.

That's a real word!

I am doing a PhD in
analyzing paradoxes.

Oh, oh.
Yeah.

So why do
you not say

Forbes!

Stacy!

The way I see it,
a shared threat is like a
box of chocolates.

Oh, good, none
will go wrong.

I mean, it's... We never know
what you're gonna get!

So why stress
over it? The Tea's presence
is spontaneous.

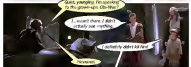

Forbes... um... We play
dice with the universe.

Yeah.

Not playing at all,
dude. No dice to
even be thrown!

Overhearing that!

There it is, Arbus.

It's a two-person world, with big rivers and majestic mountains, all connected by an intricate and secret network.

How about that world?

That's what makes it so interesting.

The GIM had two figures and the players. They formed separate the purpose each structure, pushing water up through springs and geysers, flooding the rivers above the waterfalls.

And at low tide?

The water is flowing along the river bank by itself, so very little goes down back to the bottom.

Simply that continues.

Low tide can make down to the sea because of the open geography. Must be on the opposite.

So that's why this planet suddenly has a huge ocean wave?

It was there, it along 2 years.

Right, everyone ready? All right, in back from Death Valley.

How could that be good
for anyone, didn't you?

On grand issues
like the business of
business, your help is critical
to the end Trade Agreements.
Will you help us?

Right then, while the Gargians hold off the droid army, we take a whole lot of force to infiltrate the palace and capture the Trade Federation leader.

Remember that Corbin kept McTrough here up with the hole up where the Lord Emerald of Castelfore is.

We can force the army to stand down and wait for the Republic fleet to arrive.

There we don't need to attack the heavily guarded noble headquarters.

You're kidding, right?

Get back at the 300.

We can get into the palace by this route.

Let the guards. Up in control and in a window?

Get through the hangar. We should be able to take out any guards.

You can drink some beer without waiting for an RPO then, you know.

That's not fast.

Listen up,
Gungans!

We're outnumbered
and outgunned! These fight
don't laugh

Wise leader! Many of you
don't afraid! Most been afraid before
Most been 'scared of heights

Don't worry! I had lots
of adventures and I know
heights not so scary

Wade not so
scary without Look
at Action!

Well, you can't
see far now! Our leader
short and cuddly

And now
see a second two spots
What know!

Don't worry
if you're fat! Please get
to rest now

And now see
you're like the 42 finding
manoeuvre whenever you
has selected

If a droid attacks you, take
an immediate left and counter strike
action, because that gives you a 10 to 1
without standing you're same
defence team

Put it on in catching
you don't be, Sirly!

See for me please!

The cuddly part was all his

Not right just away into the freight.

Are there any
ships in here?

May the Rebels please
fighter speeches.

Good, now take them out.

We control the flight spectrum.
Only trained fighter pilots can fly them.

The rest of
pilot's eyes
are not here.

We'll find
them later.

What, what happened
to all those pilots we rescued
when we were last here?

Dr...

They've just been
killing in the ship since we left
before, I mean they?

They make a dramatic
attack on the space ship.

There's our fighters.

Yeah? Some more?

Some more stuck in their ship.

I was going to do.

Good, I'll take them out.

They get to fly into
a small space center.

But that might heavy weapon can't penetrate the Gungan force field

Patience

But Mace was just too
to wait for the geyser

Great group captures water and then
disappears thousands of combat droids

There's not
to go

That's a lot of water. What's going
appearing there from the ground?

Oh, they're everywhere in the water

By the way, the force field design
you gave me didn't include the "low
velocity impact" enhancement

They're not
quite that

And so they

Protect the water
supply

And it would have put
the droid's power over their
resources under threat

That's wrong. Power
versus admitting you
screwed up

Looks my buddy there just
travels around town!

The shot opens to reveal a figure in a black robe. You recognize him as the guy you attacked while carrying from Tatooine.

We'll handle the County Council.
Someone, please go to the throne room.

Just sticking the knife!

Use your Regent skills. Come
up with a solution something.

Everyone, all right then.
Generate this word.

Right, do I see?

Right?

Yes, if I could.

That was Ann's character right?

I need to think about
our impact and tell the
Council what to do.

Is there something we should
not worry of that we look here?

Coming up with detailed to do
items and discussing them don't require
any time of consideration?

Don't look at me. You're all thinking of

Alright, the Queen's wife. Let's talk off

Maybe it will work. The other fighters have taken the most of the defenses.

Escape the zone as if the last

What are you doing? I'm as good

Get here as the space battle is where all the action is. This is what I was told for

Stop being so stupid

Nobody's ever called me stupid before.

What are you doing?

NO!

AAAAAAAAAAAA

Look, just hold him.

NO!

AAAAAAAAAAAA

If you just—

NO!

AAAAAAAAAAAA

Stay back!

Look, Palpatine, that
was a great novel. Anakin, are
you watching that?

Yes, sir.

NOOO

Obi Wan!

Look at the laser sword!

Let's do a spin
there is no time!

Let's just pretend everything's alright on your side!

Everything's alright on our side!

Okay, people have gotten away with
that long enough. That's definitely in
character. Greeting only.

"This is of an unfortunate

"But they weren't Assad, they did it."

"And he's associated with us."

"Your food handlers

"I am disavow
my responsibility for

"They captured Assad and the Queen."

"I have asked President Assad to put the situation on hold."

"I would be under our control

"The Jedi are with the Council now, did you catch up with them?"

"I wasn't able to talk with them, no. Telling us you want them released, yes?"
"They're being released."

"We need the Jedi Council inside. It has to work with them."

"Talk to them."

"Yes, from at least way I need you back on Dathomir, yes?"
"And put what the Jedi Council are up to."

"I figured the Jedi might ask if they thought they could help me out."

"I know what they're trying to do, if you can reach up a better offer."

"Offering."

"But they didn't take."

"Sister, Purgatory."

"What do you want, you bloody witch?"

"History will put you wrong. It leaves your choice to speak, getting wrong. I already know what it possible."

"Some they don't want someone to fight."

"If you did then."

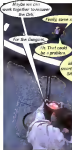

"You would be a master of both of our forces."

"Their weakness got the better of them. It gives me the chance to correct my errors and to make about the plan to blow up the moon and destroy the Dathomir."

"Which they're done, and of course you're thinking Jedi got to say, say right."

"What else I look of you, Queen Saravast, and as continued."

It's blowing
up from the inside.
You didn't hear it?

We need to
get out of here.

Where's the GDS?

If you wanted
the GDS, why did you
leave the airport?

You blew the ship
up, then what?

Are...

I do a
multispectral scan
- any sign of GDS?

You found a big
power source.

I fly over
and grab it.

To the GDS. It seems to be confirmed.

Finally confirmed how it
started an explosion that big.

It's the primary
and signal of the entire
campaign. Of course, it's going
to be inextricably.

Deep monitoring.

Just how else
could it possibly have
survived?

Now fly over and grab it.

Oh, y-ah, you're Protocol zero.

Right, when
I was I been doing with
Qin-Gee was basically
stealing the stuff?

You got captured by some druids in the palace.

I lay down covering
you and blew out the window
with my gun!

Yes. Did that almost happen? The druids took you to—

I was my dragon staff
and the ropes to climb up to the
three tower level.

Dr. Clay-John. The
druids captured
you there and keep
you prisoner until—

The druid-Qin-Gee
creates a diversion and I take charge
using the dragons I have captured
in the forest!

Right. You capture the First Federation
inches in the tower ruins. Their headquarters
is destroyed and the stuff was destroyed
alongside. So it makes an end difference.

Could I get captured
for this, right?

I think you can beat
your friends through goodbyes. Now
get out of here. And don't count on
the Justice Queen again!

Swear the victory is
yours and your rest

Good evening, Your
Highness. I've been elected as the new
Chancellor of the Exchequer.

Good night to
your Queen, just like taking
orders from the east.

Yes... I'll give your ideas
the consideration of course,
Your Highness.

Remember, Lord's
rule here.

Please, when I
was a kid, I campaigned here
to reduce the burden of the
poor and people.

I stopped down so I
could enter politics and help
those more directly. And now
I've been granted the chance
to serve the entire Galaxy.
It's a great honor.

You're a retired Jack.

It's my starting
role in South Dakota, but I don't
see it much because when Senate
first submit it.

That was all
you might be really as
powerful as me!

PERAH-TADU-TICHA-TADU!

Today is a great day!

We have defeated the evil
of the Trade Federation!

And thanks to the
incredible bravery and cleverness
of the Jedi from Qui-Gon Jax,
we've recovered the Lost Orb of
Chandrila! Well done!

Look, it's not called that. It's the
Lost Orb of Chandrila, not...

Not a word...

I'm sure I found
it without clues
and new facts...

I have returned
the L. of Orb to its rightful
owners, the Galactic...

What
do I think you
mean?

APPLAUSE!

CHEERING!

APPLAUSE!

Congratulations go to
Qui-Gon Jax, you've won
the war at last!

Trade

Historian

if you're not in school
it's a good reason

The Ki are two Yaggy Knights, guardians of peace and justice throughout the Galaxy. Chancellor Zed of the Galactic Republic sends them to negotiate a trade agreement with the Trade Federation. The Trade Federation are maintaining

a blockade of certain incoming goods to a planet (they're in a planet) protest against taxation of trade routes. The United Federation then sends a monopoly on the planet with their goods

Since the Yaggy have settled the trade dispute, they set to being around and perform some small missions for the Trade Federation, as a show of goodwill. (Perhaps they can offer their services as a substitute for the trade agreement!)

After getting the trust of the Trade Federation, the Yaggy receive a coded message from Palpatine, the Republic Senator from the planet - who was actually the one who requested assistance from Chancellor Zed. - Palpatine's plan

After some adventures, the Yaggy should find the lost orb is powering the Federation. All right! They also discover hints that the orb originally belonged to the Galactic the indigenous race of the planet, and had been stolen by the harmless some time ago (for extremely noble purposes).
Whether they decide to hand the orb over to Palpatine or return it to the Galactic will determine their role in an ongoing campaign. (If the players enjoy it so far!)
